

Market study of Eclipse in Japan from “Extensive research of development assistance tools” by NIKKEI SYSTEMS

19 September, 2007
Motoki MORI
NEC Soft Ltd.

1. Introduction of NEC
2. Outline of the research
3. Programming tools
4. Tools for unit test
5. Appendix

1. Introduction of NEC

1.1 NEC Group Profile

NEC Corporation and Consolidated Subsidiaries: 342

- As of Mar. 31 2007 -

Net Sales: ¥4,652.6 billion

- Fiscal year ended Mar. 31 2007 -

Employees: 154,786

- As of Mar. 31 2007 -

Major Operations

of the NEC Group:

IT/Network Solutions Business

Mobile/Personal Solutions Business

Electron Devices Business

(Semiconductor Solutions, Electronic
Components, and other products)

NEC Corporation in brief

Established : 1899

Chairman of the Board: Hajime Sasaki

President: Kaoru Yano

Financial results are based on accounting principles generally accepted in Japan.

1.2 NEC Soft Profile

- Company Name: NEC Soft, Ltd.
- Date of Establishment: September 9, 1975
- Capital: ¥8.668 billion
- President: Norihiko Kunishima
- Employees: 5,464 (Consolidated Basis, as of March 31, 2007)
4,652 (Non-Consolidated Basis, as of March 31, 2007)
- Head Office: 1-18-7 Shinkiba, Koto-ku, Tokyo, 136-8627 Japan
- Homepage: <http://www.necsoft.com/>
- Areas of Business:
 - Consulting, systems integration,
 - program packages, education (training),
 - business systems development,
 - systems operation support,
 - basic software and general-purpose
 - application package development,
 - application service provider (ASP)
- Shareholder: NEC Corporation

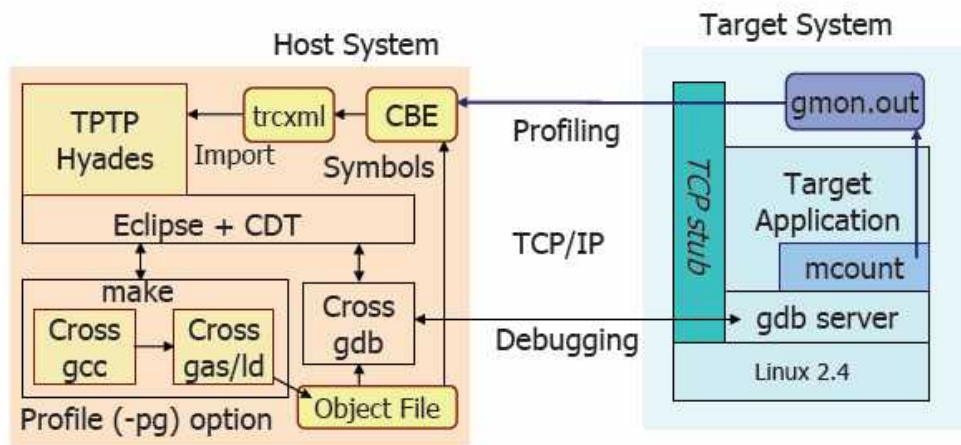

1.3 Contribution from NEC-Group(1)

Embedded systems debugging and profiling
using CDT and TPTP-based environment

Remote Profiling Architecture

- Remote debugging with gdb server
- Remote profiling with TCP stub and TPTP

Kouhei Nadehara & Yuichi Nakamura (NEC)
<http://www.eclipsecon.org/2007/index.php?page=sub/&id=4107>

1.3 Contribution from NEC-Group(2)

Rapid developing a Rich Client/Server
Application based RCP (JALCEDO)

Database Table Manipulation plug-ins
for DTP

Kazumi Ohgata (NEC Soft, Ltd.)
<http://www.eclipsecon.org/2007/index.php?page=sub/&id=4043>

Takehiro Hosokawa (NEC Soft, Ltd.)
<http://www.eclipsecon.org/2007/index.php?page=sub/&id=3970>

2. Outline of the research

■ NIKKEI BP

- is a one of the most famous business-IT publisher in Japan
- has a lot of magazines.
- This research was reported on “NIKKEI SYSTEMS Jun,2007.”

■ Researched and reported by Takashi NISHIMURA of NIKKEI BP

■ Market research on the internet

- From March 9th to April 16th 2007 in Japan
- The number of respondents was 1731

■ About programming tool

- The number of respondents 770
- Totally, Eclipse wins against Visual Studio

2.2 Respondents breakdown

2.2 Respondents breakdown

2.3 Projects breakdown

Project size

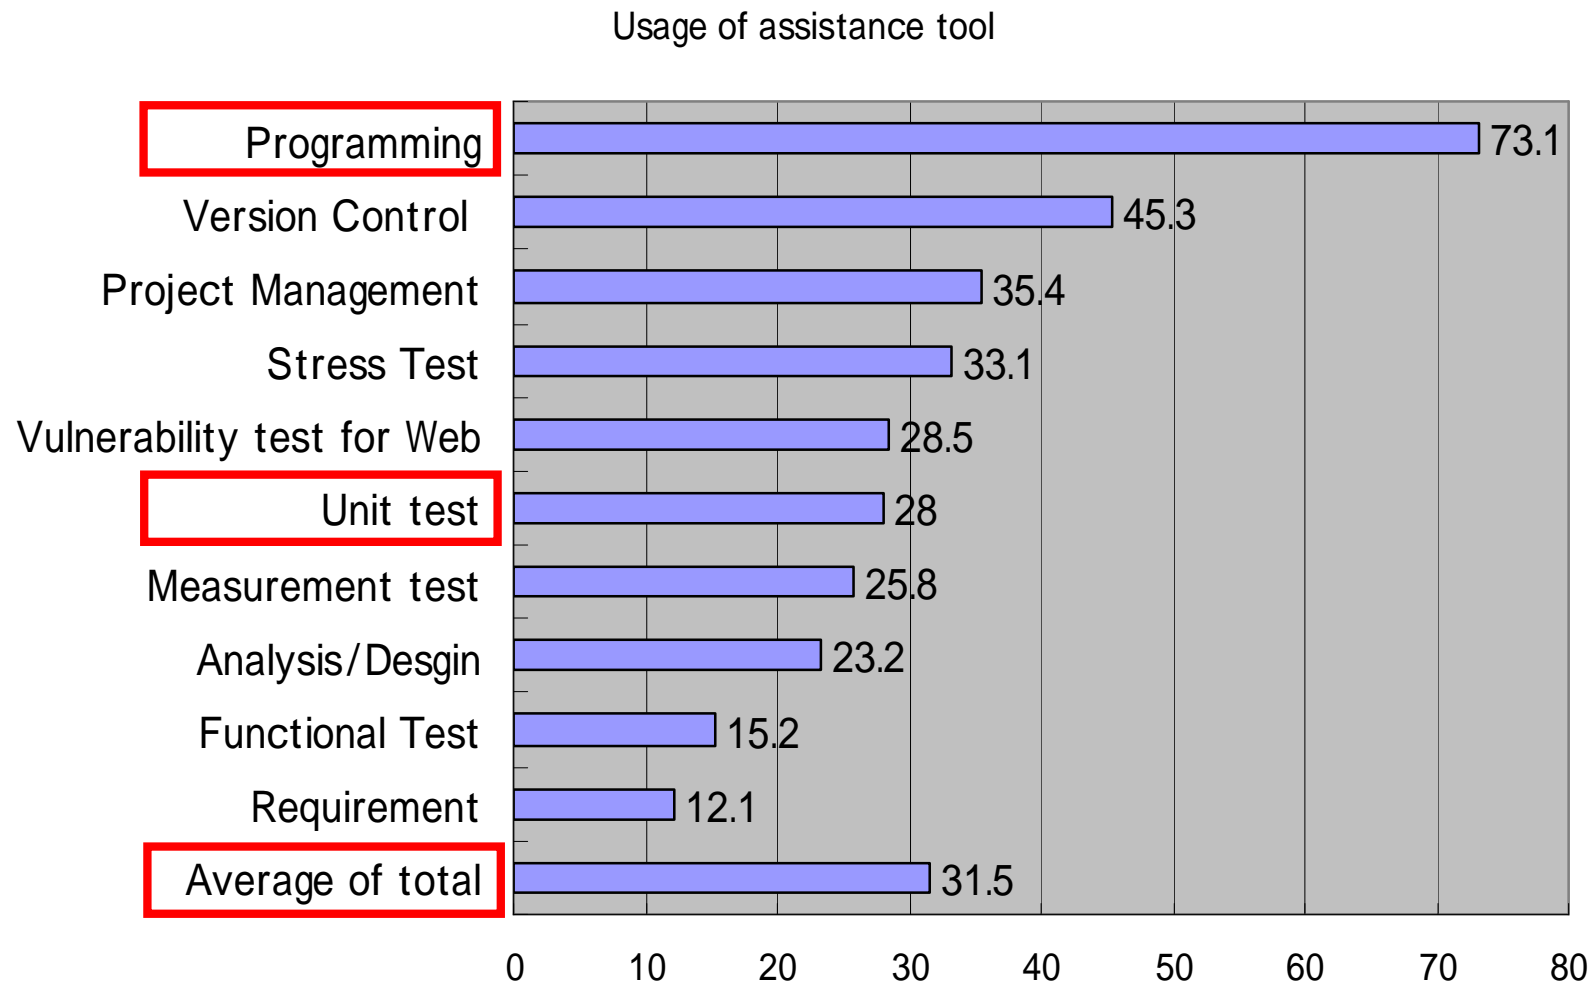

2.3 Projects breakdown

Target system

2.4 Usage of assistance tool

2.5 The reasons of “NOT” using tools

**No clear
reason**

Reason of not use

3. Programming Tools

Mainly comparison
Visual Studio and Eclipse

3.1 Market Share of programming tools

**Visual Studio and Eclipse
are 2 big names**

3.2 Project size

3.3 Languages

VB more 50%

Visual Basic C/C++ C# Java Others

Almost Java

Java PHP C/C++ Python C# Others

NIKKEI SYSTEMS
2007.6 Page27

© NEC Soft, Ltd. 2007

3.4 Reasons for Adoption

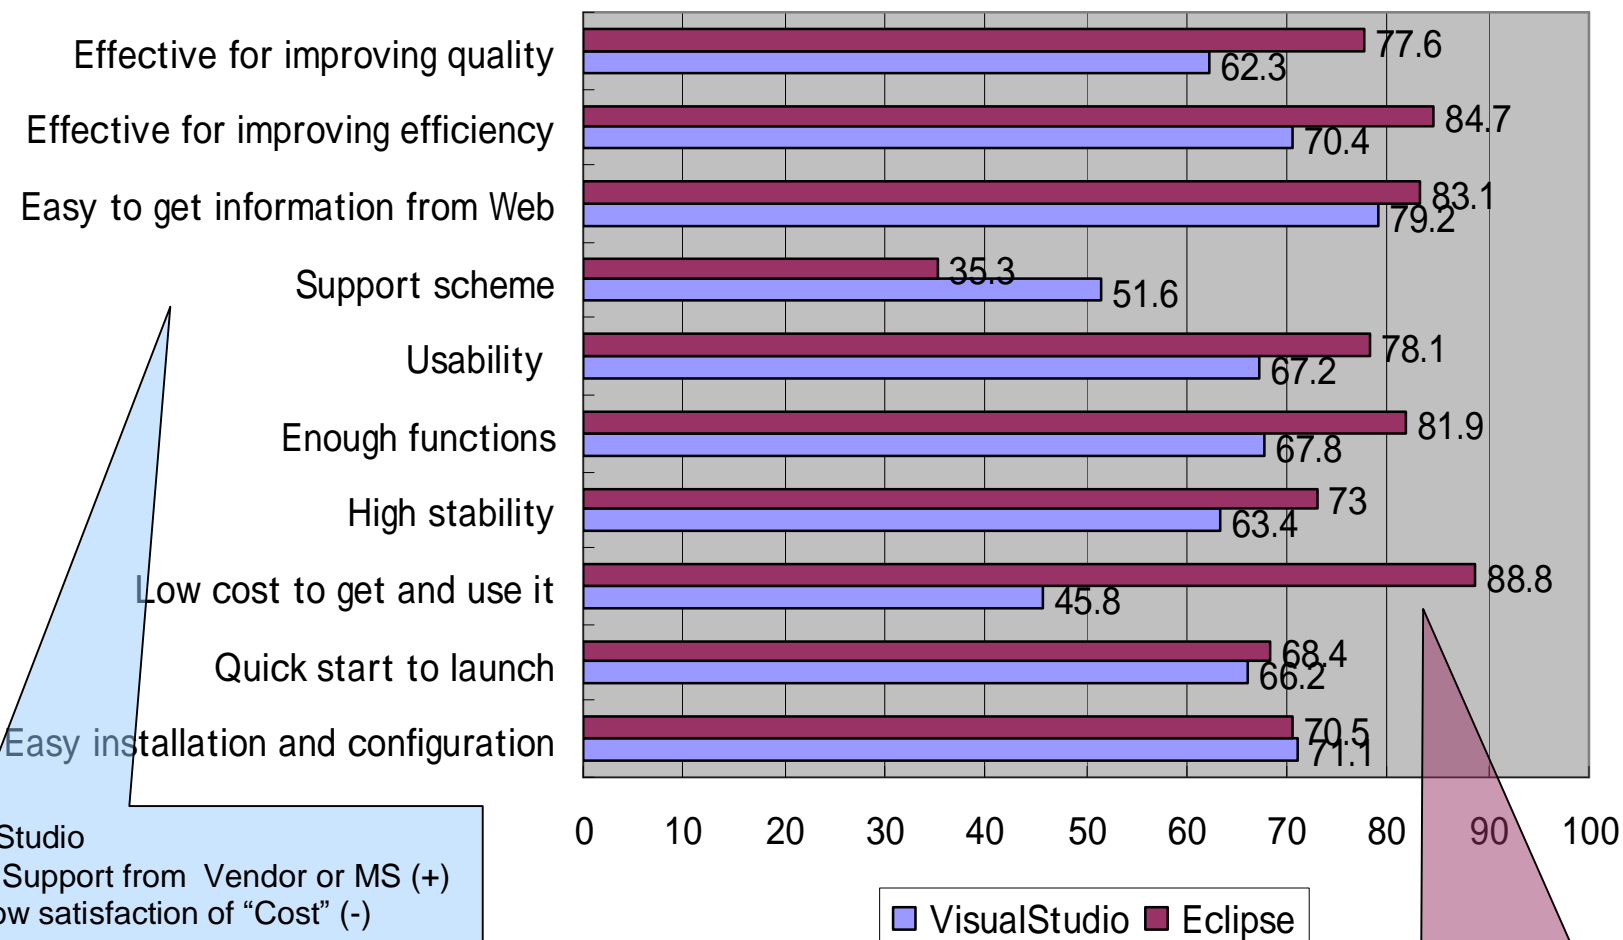

**Eclipse not only by price
but also by function and usability**

Visual Studio as “designated tool”

3.5 Valuation

Opinion

Visual Studio
Better Support from Vendor or MS (+)
Very low satisfaction of "Cost" (-)

Reprinted from:
NIKKEI SYSTEMS
2007.6 Page28

© NEC Soft, Ltd. 2007

Eclipse
High satisfaction of "cost" (+)
Improvement of working efficiency (+)

3.6 Positive Comments (sample)

Visual Studio

- Easy to manage versions. With resource sharing, convenient for development in team (VS2005)
- All-in-one environment on a local machine (VS2005)
- Useful interface expansion when class inheritance (VS.NET2003)
- Quick launch, rich functions for assistance (VS2005)

Eclipse

- Asset management by CVS is useful.(Eclipse3.1)
- WTP is useful for Web development (Eclipse3.2)
- Refactoring, filling gap function for coding, templates should be used. (Eclipse3.1)
- Fullfil plug-ins, and customizable for each project (Eclipse3.1)

3.7 Negative Comments (sample)

Visual Studio

- High spec hardware required (VS6.0)
- Lack of grid, form, scroll of the display (VS 6.0)
- Help is not enough easy to use (VS2005)
- The more functions, the more anxious thought of wrong use. (VS6.0)

Eclipse

- Working speed is not partly acceptable. (Eclipse3.0)
- Lack of upper process support functions (Eclipse3.1)
- Too much plug-ins, hard to choose them. (Eclipse3.2)
- Due to many functions, configuration is complex. Hard to identify what I should do. (Eclipse3.1)

High spec hardware required
Too much functions
Lack of functions for developing GUI

Eclipse won or got same level to Visual Studio except “support scheme”.

- There are many negative comments in common between Visual Studio and Eclipse.
- Why does Eclipse get better satisfaction?

**It comes from the difference of
“reason of adoption”**

4. Tools for unit test

3.1 Market share of Tools for Unit test

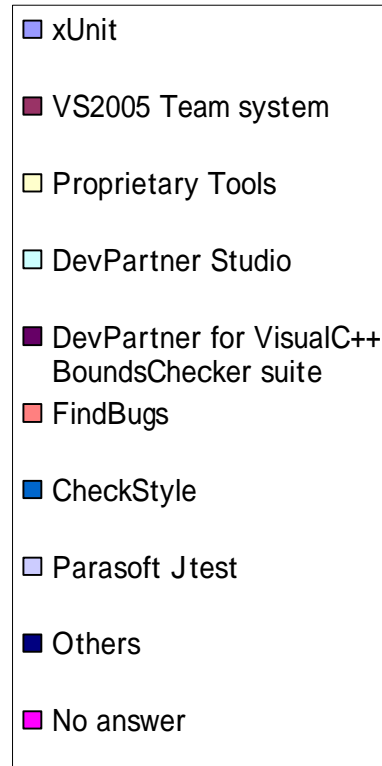

Reprinted from:
NIKKEI SYSTEMS
2007.6 Page29

© NEC Soft, Ltd. 2007

4.2 Tools for Unit test (Breakdown)

by VS users

by Eclipse users

Eclipse users tend to use OSS

5. Appendix

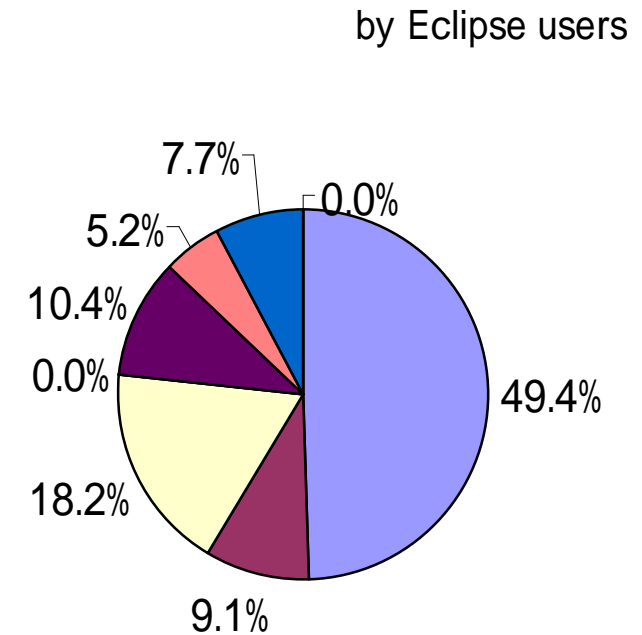

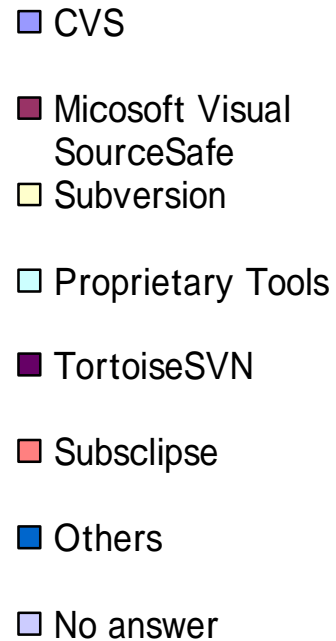

5.1 Change/Version Control

change/version control

- CVS
- Microsoft Visual SourceSafe
- Subversion
- Proprietary Tools
- TortoiseSVN
- Others
- no answer

5.1 Change/Version Control (breakdown)

The difference sticks out

5.2 Analysis/Design tools

Analysis and Design tools

5.2 Analysis/Design tools (breakdown)

by VS users

by Eclipse users
